For accountants, bankers and architects

You meet business owners before anyone else does. When one of them needs more inquiries, a launch or marketing that finally reports what it costs, you can introduce them to Tessmont by WhatsApp or a booked call, and they speak first with the Director, CA Mohammed Baaqar Shariff.

What Tessmont does

Tessmont is a marketing and growth systems company in Bengaluru, for businesses in any industry, in India and globally, from one location to many. We build the whole system: how people find the business, how they contact it, and how every inquiry is answered. Every figure we report comes from the client's own accounts, with its source, in Command, our own reporting software, and the client owns every account; we hold access only.

Who it suits

- An owner opening a new place, or starting from scratch.
- A business whose marketing is running but cannot say what each inquiry costs.
- A group with several locations that wants each one reported separately.

How an introduction works

1. Send us the owner's name and number on WhatsApp, or ask the owner to book a call with the Director.
2. CA Mohammed Baaqar Shariff speaks with the owner: 30 minutes, free, with three practical actions at the end.
3. The owner is told who introduced them. Any paid work is scoped in writing before anything is paid.

Referred clients get our best terms.

> **Speak directly with our Director, CA Mohammed Baaqar Shariff. 30 minutes, free. You leave with three practical actions.**
